# Prototyping a Social Network

AngularJS: Login using Firebase Authentication

Getting started with Pizza++ and Firebase

(GUIDED) EXERCISE
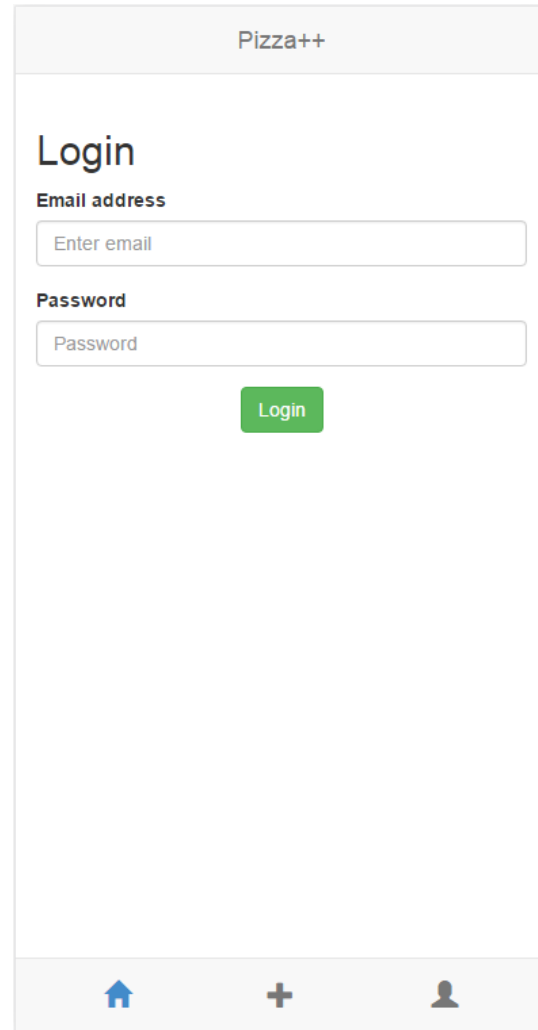

(Guided) Exercise

- Starting from the knowledge of the previous lab…

    – https://github.com/SoNet-2017/angularjs-lab8

    Integrate the Authentication:

    – At startup the app should verify if the login was already performed

    – If the login was not performed it should redirect user to a login view, otherwise it should redirect her to the view that contains the pizza list
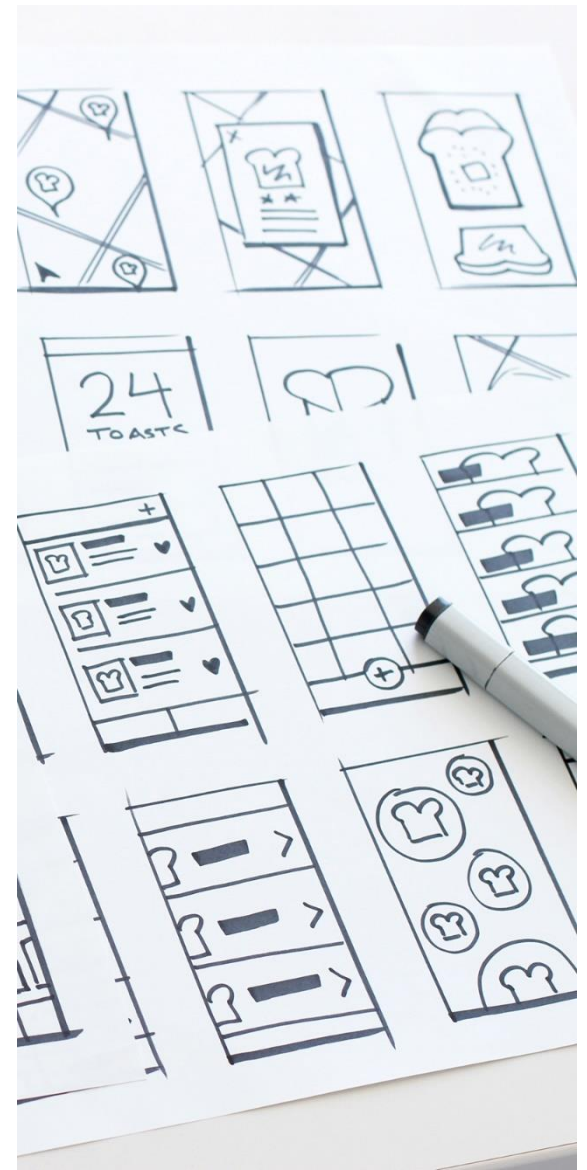

Login view

AngularJS: Login using Firebase Authentication
